

Bee Hives

WBC Hive

The traditional double-walled British hive which is often seen painted white and placed on the garden lawn. The hive takes 10 British Standard frames giving a comb area of 2,000 square inches which is approximately equivalent to 45,000 worker cells. The outer case of the hive consists of a number of tapered lifts 19 7/8" square at the top.

Langstroth Hive

The most widely used hive for honey production throughout the world. The hive was invented by the Revd. L.L. Langstroth and is the oldest moveable comb hive in use today. The outside dimensions of this top bee space hive are 16 1/4" x 20". The comb area with the normal 9 1/8" deep frames in the brood chamber is 2,720 square inches, which is equivalent to approximately 61,400 worker cells.
